

Chakraborty EMC Services

A complete solar solution

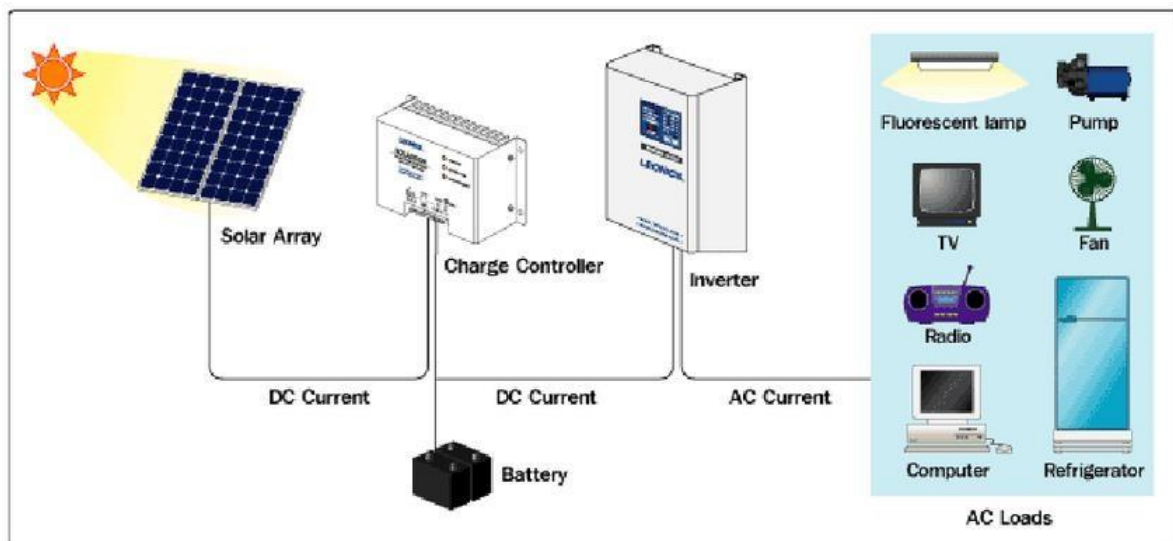

- **Why us?**

We are dedicated to providing exceptional service while offering the highest quality solar system design, installation and maintenance for our clients. Our dedicated and skilled work force always ready to serve our clients.

- **Solar System Design**

Solar PV system is consisting of solar modules, solar inverter with a comprehensive management facility & complete mounting structure (On-roof). The process photovoltaic (PV) cells convert sunlight to direct current (DC) electricity. The inverter converts DC into alternating current (AC) electricity. The electrical panel sends power to your lights and appliances. The utility meter measures the energy imported and exported.

- **Our Job Role**

1. Installation and commissioning of all kind of solar projects and its maintenance.
2. Supply of all kind of solar products.
3. Turn key projects (including supply, I & C and maintenance of any kind of Solar projects)
4. Annual maintenance of solar projects (case to case basis).

Our Recent Projects:

1. Installation and commissioning of 635KWp solar power plant on tin roof at Century Ply factory, kolkata.
2. Installation and commissioning of 35KWp on RCC rooftop solar power plant at uttar para municipality.
3. Installation and commissioning of 20KWp on RCC Rooftop Solar power plant at tollygunge, kolkata .
4. All earthing and cable laying work of 590KWp solar power plant on tin roof at rongiya, assam.
