Creating The Future Science

Bose Scientific

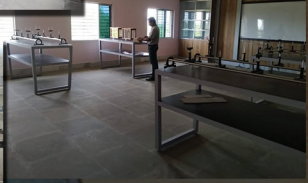

From the house of Indu Scientific

BOSE SCIENTIFIC Believes:

A school science laboratory is a place where basic experimental skills are learnt by systematically performing a set of prescribed and suitably designed experiments. Performing experiments by one's own hands is not only a thrilling experience but is also important because it entails learning by doing.

Students must be made to wear safety goggles, lab coat, and shoes in the science laboratory. Loose clothes, sandals, and open hairs should be a strict NO in school science labs. Examine glassware before using. Do not use chipped or cracked test tubes or beakers as recommended by **Bose Scientific**.

Happy Clients:

Creating The Future Science

Bose Scientific

From the house of Indu Scientific

Since the beginning of time, people have been fascinated by the sun. Ancient civilizations personified the sun, worshipping it as a God or Goddess.

Solar power is a form of energy harnessed from the power and heat of the sun's rays. It is renewable, and therefore a "green" source of energy.

Bose Scientific is now becoming a **CONSULTANCY PARTNER** with **ADANI SOLAR**.
