CORN LEAF

An alternative that converts users of paper products into responsible consumers. ... Their sustainable, disposable, biodegradable paper products are made from corn husk-agricultural waste by-products that reduce both the pollution from polymer plate use and greenhouse emissions.

SUGARCANE LEAF

Sugarcane plates are made using Sugarcane Bagasse (the residue left over after crushing the sugarcane). Polylactic Acid is derived from these biomass which have the same characteristics like PP plastic and polythene and makes it suitable a candidate to make disposable plates and cups. This is called Bio Plastic. The advantage of Sugarcane plates over traditional plastic plate is, it is derived from sugarcane whereas the traditional plastic is from non-renewable fossil fuel.

ARECA LEAF

Areca leaf plates are 100% natural, ecological, recyclable, renewable, reusable completely disposable eco- product. Areca eco palm leaf plates are the most economic & eco-friendly artifact one can use anywhere anytime keeping the environment factor in mind. Areca plates are biodegradable, human friendly and free from pest. These plates are manufactured in hygienic and natural method without using chemical and can be used for all types of food such as hot, cold, wet etc.

Benefits

- Sustainable: Made from fallen leaves, steam, heat and pressure only. No plants or trees are cut down to make Vertebra. The fallen leaves are otherwise usually burned.
- Biodegradable: Will completely biodegradable in two months when placed in a landfill or compost bin.
- Compostable: Certified compost able and tests show that compost enhances plant growth over 15%.

Replace Plastic with Copper

Copper is an essential trace mineral necessary for survival. It is found in all body tissues and plays a role in making red blood cells and maintaining nerve cells and the immune system. It also helps the body form collagen and absorb iron, and plays a role in energy production

Drinking water from a copper vessel is a good habit! Copper is an essential trace Mineral that

is vital to human body and it is known to have antimicrobial, antioxidant, anti-carcinogenic and anti-inflammatory properties. ... According to health experts, it does so by positively charging the water.

Copper is one of the few metals that can occur in nature in a directly usable metallic form (native metals).

Essential for Normal Growth and Health

Assists in Reducing Symptoms of Arthritis

Maintains hair Pigmentation, Skin and Eye color

Helps in Absorption of Iron and Red Blood Cell Formation

Prevents Premature Aging

Save Earth, Save Life And Save Future

Say 'No' to plastic bags. Instead carry Eco-friendly bags with you for shopping Economically viable sustainable products, biodegradable Bags and zero waste packaging. Beat Plastic Pollution, Promote Green Energy, Green Earth, Connecting People to Nature. Save Natural Resources like Water, Energy & Fuel for our future generation. Keep it safe for all. Develop healthy Waste Management System. Identify and separate wastes for reuse and recycle.

Keep our workplace and surroundings clean and green.

Benefits

Drive improved profitability and sustainability through innovative materials and products that address urgent environmental concerns such as plastic bags and EPS or Styrofoam packaging pollution. Products can be used as a cost effective and sustainable plastic resin alternative and zero-waste packing solution.

Green marketing strategies to enhance corporate brands. Outstanding sustainability accomplishments are recognized as a public service programs.

V

Complete the zero carbon footprint equation by developing and offering carbon offset credits derived from the highest quality carbon projects around the world.

SUNECO is a Technology Venture, Aggregator and Exporter of Eco-Friendly and Biodegradable products.

- Energy efficiency
- Ecological sustainable development
- Reducing harmful waste

- Reducing environmental impact
- Making the best use of available resources
- · Safe and pollution free environment
